Pamplin Native Returns From International Trade Fair

John Ligon, a native of Pamplin, has just returned from Lima, Peru, where he attended the third International Trade Fair of the Pacific.

Ligon represented the United States' fruit industry.

Approximately 800.000 persons attended the two week trade fair where 42 countries were represented.

Ligon designed and built the exhibit b oth at the fair where he displayed and explained the qualities of United States' apples.

"Judging from the reaction of those attending the fair, I think we can expect a sizeable increase over 40,000 boxes shipped to Peru from the United States last year," he said.

Ligon is assistant supervisor of the market expansion section with the Virginia Department of Agriculture. His duties include locating new markets and expanding old markets for Virginia apples and other farm commodities. He also works with producers and commodity groups in helping them to pack better merchandise.

Complete Wool Sales By Dec. 31 Says ASCC

All details of marketing either wool or lambs will have to be completed not later than December 31 in order to receive payments for the 1963 marketing year, J. A. Martin, Chairman, Agricultural Stabilization and Conservation Committee, pointed out today. Marketings completed after December 31, 1963, will be eligible for payments for the 1964 marketing year.

As announced by the U. S. Department of Agriculture in October 1962, the 1963 marketing year under the wool payment program has been shortened to the 9-month period for April 1 through December 31, 1963, in order to shift the wool marketing year to a calendar-year basis.

Therefore, if any part of a sale of lambs or wool is not settled by December 31, the sale will not be considered as one taking place in the 1963 marketing year. This means that all the information needed to complete the sales documents and show the net sales proceeds for wool has to be determined and available by December 31 in order to be eligible for wool program payments for the current (1963) marketing year. Under program regulations, wool is not marketed until title has passed to the buyer, the wool has been delivered to the buyer physically or through documents which transfer control to the buyer, and all information price per pound, weight, yield, etc.) needed to determine the buyers total purchase price is available.

Payments for the 1963 marketing year will likely begin in April of next year, after the program payment rates are determined, based on the average prices received by producers for shorn wool sold in the 9-month period from April through December of 1963. Payments for the 1964 marketing year on marketings taking place or completed after December 31, 1963, will be made in the spring of 1965.

Wool producers may file applications for payment for the 1963 marketing year with ASCS county offices up until January 31, 1964.
